PROFESSIONAL EXPERIENCE

KushCo Holdings Inc.

Software Developer

Cypress, CA

Sept 2017—Present

> Tool Development

Construct progressive mobile delivery app that tracks deliveries, manages fulfillments, and captures customer signatures. Utilize Vue.js to build intercompany and client facing CPQ tool to allow end-users to customize products and generate quotes. Develop backend servers for all tools using Node.js and Ruby on Rails while enforcing RESTful API best practices, token based authentication, and data encryption.

> Business Automation

Collaborate with Business SMEs to design solutions for complex business processes and work flows. Increase company productivity by automating error-prone and time-consuming task with extensible scripts. Refactor legacy automation code by modularizing code base and implementing stricter coding standards with TypeScript.

> Third Party Integrations

Develop REST and SOAP web services to communicate between ERP system and external third party systems. Integrate Oracle's NetSuite with Manhattan's SCALE warehouse management system to maintain synced inventory across two environments. Integrate Teamwork's project management system with Oracle's NetSuite to maintain synced tables throughout bidirectional PM process.

Trilogy Education Services

Web Development Tutor

Irvine, CA

Feb 2018—July 2018
